

## **Grateful to the Vet Who Saved Her Horse**

26.JAN.08

I own a 15 year old QH/Morgan gelding named Tyson . Tyson was in a bad boarding situation in Atkinson, NH. He was abused and neglected. Tyson was in colic at least three times a week. Tyson could not tolerate grain, was underweight and could only have timothy hay. After bringing Tyson home in September of 2007, I tried with several nearby veterinarians to rehab Tyson, but I felt Tyson needed so much more.

I posted an ad online to see if anyone could refer me to an Equine veterinarian. I got one reply from Jodi, Dr. George's veterinary technician, stating that she works for a new practice coming to Deerfield, NH, and that they would try to help me out. That's when I met Dr. George from Deerfield Veterinary Clinic. He came right out to my home in Merrimack, NH to examine Tyson. After doing a few tests and knowing of Tyson's symptoms, Dr. George suspected Tyson was suffering from an ulcer! Dr. George acted immediately and made arrangements to get Tyson the correct medication for the diagnosis.

Within three days Tyson started eating and acting better. Within two weeks Tyson was able to tolerate grain again and a better quality hay. Currently Tyson is eating grain and hay, gaining weight and has his frisky personality back again! Dr. George was very understanding of my personal situation and made the ulcer treatment affordable but effective. I called Deerfield Veterinary Clinic almost every day with concerns about Tyson and Dr. George always answered my calls right away or called back within a few hours and always explained everything in detail. The staff at Deerfield Veterinary Clinic was and still is also very helpful, understanding and as much as I called there with questions I never get a negative attitude.

It is very stressful when you have a sick animal and don't know what to expect or what the outcome will be but Dr. George assured me that he would do all that he can to help Tyson get better and treated Tyson as a very important part of my family and not "just a horse". Dr. George saved my Tyson's life! Tyson and I are and always will be very grateful!!

Thank you Dr. George!  
Diane Quigley and Tyson
